

Thank you for ordering  
DMC Flower thread from Dutch Treat.

Before you start stitching  
we encourage you to wrap your  
DMC Flower Thread on floss bobbins.

We love to stitch with Flower Thread. It is great to work with a thread that is just one ply. However, we have found that when you try to pull the DMC Flower Thread from the skein, just as you see it, most of the time it will *knot*. Flower thread does NOT knot when you stitch with it. So, to make your stitching experience a happy one, we encourage you to wrap your Flower Thread on floss bobbins before you start stitching. Floss bobbins were not included in your order. They can usually be purchased at your local LNS or hobby store. Since this thread is no longer being made, each skein could be the last one of that color that you will find.

To wrap the Flower Thread, take the wrappers off and slip the skein over your wrist like a bracelet. Find a loose end and wrap the skein. This takes a little time, but avoiding any knots is worth the effort. Happy stitching!
